

Assignment 5

Exercise 1. Create a document which

- a. Uses a document class other than `article`.
- b. Contains at least one `\newcommand` or `\newenvironment` command of your creation.
- c. Uses the `listings` package for typesetting code.
- d. Uses `enumitem` to create a custom enumerate or itemize environment. (For example, uses letters for list items instead of numbers as in this list.)
- e. Typesets at least three numbers or units using the `siunitx` package. (Read the documentation at <https://www.ctan.org>).
- f. Uses another package that has not been called in a previous assignment.
- g. All of the above packages and newcommands are placed in a `.sty` style file which is then called by the main `.tex` file.
